

DEMO PRESENTATION — 2026

Local Hands

Trusted local services, recommended by
your community.

01

The problem

- Finding a trustworthy plumber, tutor, or cleaner is still word-of-mouth
- Word-of-mouth doesn't scale beyond your immediate circle
- Generic platforms like Upwork are too global and impersonal
- You have no idea who you're letting into your home

02 — THE SOLUTION

Local Hands is a two-sided community marketplace that connects residents who need help with verified local service providers — rated and recommended by their actual neighbours.

02

How it works

1

Post a job

Describe what you need, set a budget, and pick your urgency level.

2

Providers respond

Local providers express interest with their estimate and public profile.

3

Hire & review

Choose the right person, get the job done, leave a rating for the community.

04

For residents

- Browse verified providers filtered by category, rating, or area
- Post a job and let interested providers come to you
- Save favourite providers for quick access later
- See value scores so you know you're getting a fair deal

RESIDENTS

PROVIDERS

05

For service providers

- A public profile with star ratings, reviews, and a value score
- Contact details visible to residents once you're verified
- Express interest in open community jobs with your estimate
- Build a reputation in your local area over time

Community trust built in

Verification badge

Manually reviewed providers stand out from the crowd

Star ratings

Rating and review count displayed on every provider profile

Value score

A 0–100 composite of price, rating, and reliability

Location-scoped

Only see providers and jobs relevant to your area

07

Multi-market from day one
